EDUCATION

**Bachelor of Engineering - Information Science
Technology (BE-IST)**
University of Technology Yatanarpon
Cyber City(UT-YCC)

SKILLS

- Programming knowledge in Java, Kotlin , Jetpack Compose , Android (java) ,XML , Android SDK, Swift , C++ , Javascript
- Structuring code base with Object Oriented principal
- Experiences in developing Android Framework , AWS Technologies , Java Native Interface
- Databases - Room ,MongoDB, SQLite, MySQL
- Firebase (cloud message APIs and push Notification) , OneSignal
- CI/CD Integration
- Image Lib - Picasso , Glide , Coil
- Testing - Unit , Integration , UI
- Dependency injection - Dagger Hilt
- Kotlin Coroutines , Flow
- Version Control System - GitHub, Bitbucket.
- Messaging Services - Sendbird , Agora , Firebase
- Excellent critical thinking and analysis of Algorithms
- Ability to learn new technologies, communicate to new members

Shine Thyu Zan

Android Developer

WORK EXPERIENCE

Android Developer (Java)

2024 - present

Joy Groups International

Shwe ALote – A comprehensive job search app connecting users with local and global career opportunities. Designed and developed core features for seamless job discovery and user experience.

- **AppStore Link** - <https://apps.apple.com/th/app/shwe-alote/id6738405750>

Aung Property – A reliable property search app for renting or buying houses in Myanmar, Thailand, and beyond. Built intuitive UI and integrated location-based search for efficient property matching.

- **AppStore Link** - <https://apps.apple.com/th/app/aung-property/id6739699480>

Android Developer (Kotlin)

2022 - 2024

Galaxy Techno Company Limited (YouKnow Software House Department)

We created an app inspired by social media platforms like WeChat, using Android Kotlin. We built it with Jetpack Compose following an MVVM clean architecture, and we enhanced the user interface with Material 3 design elements. Our app offers essential features like authentication, chat for both one-on-one and group conversations, settings management, and a convenient friend-adding system using QR codes. We integrated RESTful APIs and third-party libraries, and we boosted its capabilities by incorporating Google Firebase cloud messaging and Agora service.

- **AppStore Link** - <https://apps.apple.com/mm/app/youknow-social/id6449172297>

Android Developer (Kotlin)

2021 - 2022

Tri Group of Company Limited

We've developed an education-focused social media app using Android Kotlin and following the MVVM architecture. Our app integrates peer-to-peer chat functionality, powered by the Sendbird service, to facilitate seamless communication among users.

Android Developer (Java)

2019 - 2021

Interwebbing Myanmar Technology Company Limited

We have spearheaded the development and design of mobile applications using Android Native Java Languages. These apps span across various domains including POS, E-commerce, and Trading Transactions.

To enhance their functionality, I seamlessly integrated RESTful APIs, utilized third-party libraries, and incorporated Google Firebase cloud messaging.

Software Engineer

2017 - 2018

Marelli Company Limited

I dived into learning the C programming language while also working on a really interesting project about car audio systems and speed meters. While I was coding, I made sure to write down everything about the project, like how it's built and how it works. Doing this made me better at programming and helped me explain technical stuff better.

Projects

BallGuru Application

- The BallGuru App is all about live football streaming, keeping you updated on the latest matches and soccer news. On the first screen, you'll find Google ads and a skip button, along with a sample video link for easy viewing.
- Included two screens: one for live games featuring match times, predictions, and live stream links, and another for reading player transfer news, UEFA teams information, and more engaging content.

Tech

- Kotlin - 1.8.20
- Jetpack Libraries
- MVVM with Clean Architecture
- Kotlin Serialization
- Coroutines : concurrency
- Flow : Stream programming
- Dagger Hilt : Dependency Injection
- Timber : Logging
- Material Components
- Firebase Cloud Firestore
- Firebase Cloud Storage
- Coil
- Paging 3
- One Signal Push Notification

Apk Pure link - <https://apkpure.net/ball-guru/com.po.ballguru>

Github link - <https://github.com/ShineThyZan/BallGuru>

YNote Application

- Introducing a simple note-taking app for Android users. It offers features like creating, editing, and deleting notes, along with password protection for privacy.
- Powered by Room database, it ensures smooth data handling. You can find the app on ApkPure and clone the project on GitHub. Perfect for quick and secure note management!

Tech

- Jetpack Compose
- Material 3
- Paging 3
- Retrofit
- Proto Datastore
- Room Database
- Coroutines
- Dagger - Hilt

Apk Pure link - <https://apkpure.net/ynote/com.omgea.mynote>

MeMe Downloader Application

- This application displays meme pictures with rankings and provides a detailed view for each. The detailed screen features a download button, picture name, and rating points. Users can easily search for specific pictures by name from the meme picture list.

Tech

- Java (Android)
- Gson
- RxJava
- Retrofit
- Android recycler view
- Animation Xml
- View Pager
- Glide Image Library

Apk Pure link - <https://apkpure.net/meme-downloader/com.example.cocktailrecipe>

Github link - <https://github.com/ShineThyZan/MeMesDownloader>

Photo Album Application

- The application showcases meme pictures along with their rankings, offering users a detailed view of each image. Within the detailed screen, users can find a download button, picture name, and rating points for further engagement.
- Additionally, users have the convenience of searching for specific pictures by name directly from the meme picture list.

Tech

- Kotlin - 1.8.20
- Jetpack Libraries
- Material Components
- Unit Testing
- Firebase Cloud Firestore
- Firebase Cloud Storage
- Coil
- Paging 3
